Is Reasonable Security Achievable in the Corporation?

The term "Reasonable Security" is appearing in news headlines and inside court rooms. Regulators are increasingly conducting examinations of breached corporations to determine if preventative "Reasonable Security" measures are being deployed across the enterprise. Class action litigation representatives are also questioning, if a lack of "Reasonable Security" contributed to breaches in their complaints. Hear how "Reasonable Security" can be achieved across the pillars of people, process, and technology—including the implementation and management of proactive "Reasonable Security" measures. And explore how to evaluate and measure if "Reasonable Security" is in place, and how to identify gaps that may exist in a cybersecurity program.

Emerging, Disruptive, Game-Changing Technology

Technology is pushing the limits of almost every sector of society, from the personal to the professional. With every advancement comes opportunity, disruption, risk, security issues, and privacy concerns. Often, we focus on the technology of today, failing to look ahead to where technology might advance tomorrow. Hear more on expectant emerging technologies including blockchain, smart cities, artificial intelligence, biometrics, and even the new imperatives to better understand work-from-home and work-remote options.

UT Law CLE is committed to Practice Excellence.

We are here to support our community while we navigate the coronavirus pandemic together. Information and updates regarding our in-person conferences and live webcasts will be posted at www.utcle.org.

In addition, we continue to offer multiple educational opportunities online—both live and on-demand—by bringing practitioners together virtually. We are fortunate to serve so many of you who strive for excellence in the practice of law.
