Earn up to 7.50 Hours of Credit Including 1.00 Hour of Ethics Credit

ABOUT THE PROGRAM

The abilities to frame a defensible litigation, and hold or shepherd an effective request for production of electronically stored information, are essential skills for 21st century litigators. Lawyers and firms who aren't adept with electronic evidence fairly invite malpractice claims, and those who know how to handle electronically stored information enjoy a huge competitive advantage.

This program is geared to lawyers, legal assistants and IT professionals seeking an in-the-trenches view of electronic data discovery. The workshop structure invites a high level of audience interaction and direction, and the faculty are seasoned e-discovery veterans ready to be questioned and challenged throughout the day to insure that the information they share is what best serves your needs.
