Texas Two-Step: What's all the Fuss About?

The Texas Business Organizations Code permits a Texas corporation, LLC or limited partnership to merge into itself and thereby divide its assets and liabilities among itself and one or more additional new entities, but may not thereby prejudice the rights of its creditors under existing laws. Delaware permits LLC and limited partnerships (but not corporation) to effect similar divisions. Recently businesses with mass tort liability litigation have used divisive mergers to apportion their assets and liabilities so that the litigation is allocated to a surviving new entity with limited assets, filed for bankruptcy, and the plaintiffs have challenged the actions in courts with mixed results. Hear a summary of the state of play in this zone.

Drafting Net Profit Agreements

Net profits agreements are used in transactions where the parties have an interest in sharing in profits but do not want to create or participate in an entity arrangement with the parties involved. Net profits agreements raise a number of issues which may be as basic as the very definition of what the parties intend to share, as well as the methods of payout, the impact on tax consequences of these arrangements and concerns relating to the unintended partnership. Review the issues lawyers may need to consider with their clients to draft an effective net profits agreement.
