#### THURSDAY AFTERNOON

Presiding Officer: Ed Kwok, San Jose

1:30 p.m. .50 hr

### Written Description and Section 112: Impact on Biotech Patenting

Recent Federal Circuit cases discussing written description suggest that the Court's stance on this doctrine may be shifting. Is biotech finally getting a break in Capon v. Dudas? Is it really all about new matter as suggested in Pandrol v. Airboss? And what might we expect next?

Karen Boyd, Redwood City

2:00 p.m. .50 hr

#### **Doctrine of Equivalents**

How viable is the doctrine of equivalents as an infringement theory post-Festo, and how is it proven at trial?

Paul S. Grewal, Cupertino

2:30 p.m. .50 hr

### Remedies in Component and Downstream Cases, Including ITC Options

Discussion of the problems and solutions for the patent owner when an infringing part is used in building a larger system. Includes discussion of avenues for pursuing (1) foreign infringers and assemblers, (2) importers, and (3) domestic sellers, in both district court and the ITC. Will also cover the limits on injunctive relief and customs seizure when the value of the larger system far exceeds the value of the infringing component, and recovering damages for loss of market share and lost profits from foreign infringers.

L. Scott Oliver, Palo Alto

#### 102 (b)

What conduct triggers the on sale of public use bars of Section 102(b)? What conduct constitutes experimental use? This discussion will review recent Federal Circuit cases applying Section 102(b) and address the current state of the law.

Mark Itri, Irvine

9:00 a.m. .50 hr

#### Inducement and Indirect Infringement

In its recent Grokster decision, the Supreme Court purported to apply the patent law doctrine of inducement of infringement to claims of copyright infringement. We will explore the extent to which the doctrine as articulated in Grokster in fact goes further than existing patent law, and consider the question of how patent law inducement doctrine might evolve in light of Grokster.

Gary N. Frischling, Los Angeles

10:35 a.m. .50 hr

## The Statutory Research Infringement Exemption: How Far Back is "Reasonably Related"?

The U.S. Supreme Court's decision in Merck KGaA v. Integra Lifesciences I, Ltd., 125 S. Ct. 2372 (2005), enlarging the statutory research exemption to patent infringement of 35 U.S.C. § 271(e)(1), left several questions unanswered. For example: how far back the statutory exemption should apply, and what is the status of the common law experimental use defense to patent infringement. The Court left this specific guidance to the percolation of case law through the district courts and the Federal Circuit.

Meredith Martin Addy, Chicago, IL

11:05 a.m. .50 hr

#### Antitrust, Patents, and Standard-Setting

Recent cases and investigations brought by the Federal Trade Commission and other enforcement agencies have highlighted the risks associated with enforcing patents covering products developed through industry standard-setting efforts. Standard-setting organizations are exploring changing the rules covering the disclosure of patents during the standards process. This session will cover the implications both of increased antitrust enforcement in this area and the standards community's response, both of which lie at the crossroads of patent and antitrust law.

Gil Ohana, San Jose

11:35 a.m. .75 hr

### Open Source: Giving Away Patents and Managing Open Source Assets

This session opens by examining the generous grant of patent right under open source licenses, and the affect such grants have on industry standards. Other types of "give aways" via standards will also be discussed. The session closes with a discussion of practical strategies and policies to manage the use and acquisition of open source assets.
