International Patent Prosecution Issues

In today's global economy, most companies receive significant revenue from overseas business activity. Furthermore, a significant portion of a company's strategic IP is now being created and infringed outside the United States. A robust global patent protection and enforcement strategy is key to continued business success. A panel of three patent experts will address prosecution, financial, political, and business issues that attorneys and companies will face when creating and operating multi-national patent programs. Special focus will be given to markets in and around India, China, and the EU.

Moderator: Keith E. Witek, Advanced Micro Devices, Inc., Austin, TX

Strategic Patent Prosecution

Successfully prosecuting a patent application without creating *Festo* estoppels, while maximizing claim scope and avoiding the embarrassing amendments and remarks is even more difficult today in view of the *KSR* decision. This presentation explains how to do so.

Richard A. Killworth, Dinsmore & Shohl LLP, Dayton, OH

9:45 a.m. .75 hr

Patent Prosecution Procedure: Welcome to the Brave New World

The United States Patent Office has published new rules which limit the number of claims in an application that will be initially examined, and which limit the number of continuation applications that can be filed. What types of claims should you select for examination under this rule and what impact should the limit on continuation applications have on your prosecution strategy? Additionally, revised rules for submission of Information Disclosure Statements are imminent and new rule packages have been proposed which will limit the use of Markush claims and which revise the format and procedure for appeals to the Board of Patent Appeals. Tactics and strategies for the changing prosecution landscape will be discussed.

Developments in Claims Construction

Overshadowed by the US Supreme Court/ Federal Circuit colloquy, this core issue has percolated along quietly. This year's pitfalls and construction trends of the moment will be explored, with an eye towards a more tactical approach to *Markman* mechanisms responsive to those trends. The Federal Circuit still controls the keys to the kingdom, but are the locks secure?

Extraterritoriality after AT&T v. Microsoft

At this very program one year ago, the Federal Circuit's decision in *AT&T v. Microsoft* was analyzed and criticized at length. Just minutes after the presentation ended, the Supreme Court announced that it would review the Federal Circuit's decision. Late this spring, the Supreme Court reversed the judgment in *AT&T v. Microsoft*, reducing the damages award by hundreds of millions of dollars. This year, the impact of the Supreme Court's decision will be discussed, both in the context of lower court decisions and in the context of legislative proposals, many of which had previously suggested a complete repeal of section 271(f).

Attorney Opinions as a Defense to Willful Infringement and Special Problems of Waiver

This topic will cover attorney opinions in connection with defense against a charge of willful infringement. It will address special problems of waiver of privilege in light of recent case law, including *In re Seagate*, *In re Echostar*, and *Knorr-Bremese*.

William L. LaFuze, Vinson & Elkins LLP, Houston, TX

2:45 p.m. .50 hr

Update on Patent Damages: Considerations in Determining Royalty-Based Compensation

Several recent Federal Circuit and Supreme Court decisions have directly affected patent prosecution, liability decisions and patent licensing activities. These decisions have received much attention in legal circles and even in the popular business media. Recent

decisions related to damages have not been highlighted to the same extent. This session presents a brief panel discussion to re-cap the most important new developments in the area of patent damages. Topics will include compulsory licensing (*eBay v. MercExchange* and *Finisar v. DirectTV*) as well as apportionment, entire market value and royalty stacking (*Microsoft v. AT&T* and others).

E-DISCOVERY WORKSHOP

Earn up to 7.50 Hours of Credit Including 1.00 Hour of Ethics Credit

Wednesday, October 24, 2007

Four Seasons Hotel

Austin, Texas

ABOUT THE WORKSHOP

The abilities to frame a defensible litigation, and hold or shepherd an effective request for production of electronically stored information are essential skills for 21st century litigators. Lawyers and firms who aren't adept with electronic evidence fairly invite malpractice claims, and those who know how to handle electronically stored information enjoy a huge competitive advantage.

This program is geared to lawyers, legal assistants and IT professionals seeking an in-the-trenches view of electronic data discovery. The workshop structure invites a high level of audience interaction and direction, and the faculty are seasoned e-discovery veterans ready to be questioned and challenged throughout the day to insure that the information they share is what best serves your needs.
