Mark A. Lemley, Stanford Law School and  
Durie Tangri LLP, Stanford, CA

**9:20 a.m. .50 hr**

**Claims Drafting Strategies and Prosecution  
Issues**

Patent prosecutors spend every day drafting and prosecuting claims to ensure that they comply with Sections 101, 102, 103 and 112. Further, most—but unfortunately not all—know how to avoid mistakes that result in an unnecessarily narrow claim construction. Often overlooked, however, are the steps a patent prosecutor can take to maximize a damages award or capture a direct infringer so his client faces fewer hurdles in proving infringement at trial. This presentation, based on the latest decisions from the Federal Circuit, shows how careful drafting and prosecution of patent applications can avoid the lesser-known, but often fatal, problems that patentees face in patent litigation.

Erik R. Puknys, Finnegan, Henderson, Farabow,  
Garrett & Dunner, LLP, Palo Alto, CA

**9:50 a.m. .50 hr**

**Claim Construction: Play Continues**

Claim construction remains the engine driving the patent train, both in preparation and prosecution, and in litigation. As Federal Circuit personnel change, does precedent change claim construction "in the field," despite *Phillips*? Discussion of the year's cases is focused on that question.

Kenneth R. Adamo, Jones Day, Dallas, TX

**10:20 a.m. Break**

**10:35 a.m. .50 hr ethics**

**Inequitable Conduct**

After years of differing opinions, the Federal Circuit will consider en banc the standards to apply to inequitable conduct in *Therasense v. Becton Dickinson*. The presentation covers the need for en banc review, the issues raised in *Therasense* and possible outcomes.

Darryl J. Adams, Baker Botts L.L.P., Austin, TX

**11:05 a.m. .50 hr**

**ITC Update**

It is the new favorite forum for non-practicing entities—the bar for entry has been lowered and the threat of an injunction has increased.

Hilda C. Galvan, Jones Day, Dallas, TX

**11:35 a.m. .75 hr**

**Patentable Subject Matter: Back in the  
Federal Circuit's Court**

In *Bilski*, the Supreme Court reaffirmed the bar against patenting "abstract ideas" while rejecting the exclusivity of a machine-or-transformation test for process patentability. Also in 2010, a district court judge ruled that claims for isolated genetic sequences and their diagnostic use lacked patentable subject matter. Where might the law go from here and how might private parties react?

John M. Golden, The University of Texas School of  
Law, Austin, TX

**Navigating Injunctions and Motions  
for Contempt: Effective (and Ineffective)  
Design-Around Strategies**

A summary of cases involving post-judgment enforcement of injunctions, contempt proceedings and new infringement actions. The discussion includes the en banc hearing in *TiVo v. EchoStar* (Fed. Cir. 2010) and suggested strategies for wording injunctions, for enforcing injunctions, and for designing around patents and injunctions.

Tom Adolph, Jackson Walker LLP, Houston, TX

**2:00 p.m. .50 hr**

**Surveys in Patent Litigation: Use or Abuse?**

The use of surveys in patent litigation to attempt to prove direct infringement and damages appears to be a growing trend. This presentation examines why plaintiffs may choose this path, discovery issues relating to patent surveys, and issues relating to the use and admissibility of patent surveys at trial.

Kevin Sean Kudlac, Weil, Gotshal & Manges LLP,  
Houston, TX

**2:30 p.m. .50 hr**

**Grey Markets: Costco and Its Potential  
Implications for Copyright and Patent  
Exhaustion**

The Supreme Court has granted certiorari in *Costco Wholesale Corp. v. Omega, S.A.* to decide whether the "first-sale doctrine" in U.S. copyright law applies to imported goods that have been made abroad by the copyright owner. And in *Fujifilm Corp. v. Benun*, the Federal Circuit recently held that the Supreme Court's decision in *Quanta* did not eliminate the territoriality requirement for patent exhaustion. This presentation examines the potential impact of *Costco* on copyright and patent exhaustion, including the territoriality requirement for both.

Douglas W. McClellan, Weil, Gotshal & Manges LLP,  
Houston, TX

**3:00 p.m. Break**

**3:15 p.m. .50 hr**

**Damages, Part I: Legal Developments in  
Licensing Issues, Apportionment and  
Reasonable Royalties**

With district courts, the Federal Circuit and Congress taking aim at a wide range of patent damages issues recently, including *Georgia-Pacific* factors, the EMVR, customer demand, licenses and settlements, and the competency and sufficiency of expert testimony, many questions have been raised about how clients and practitioners should approach damages claims now, and the kinds of evidentiary support and economic proof that may be required for damages awards capable of surviving scrutiny at every level.

Bruce S. Sostek, Thompson & Knight LLP, Dallas, TX

3:45 p.m. .75 hr

### Damages, Part II: Litigation Strategies

Two experienced patent trial attorneys, along with experienced financial testifying experts, use a point-counterpoint format to discuss new approaches to presenting and defending damages in patent cases that have emerged in the wake of several recent Federal Circuit rulings curtailing damages in patent cases. Topics include apportioning the value of the claimed features, analyzing and applying license agreements, handling assertions of non-infringing alternatives, and other economic and trial issues related to patent damages.

### Design Patent Litigation Post-Egyptian Goddess

The Federal Circuit's decision to eliminate the "point of novelty" element of design patent infringement proof was the first of a litany of district court and Federal Circuit decisions that impact the way in which design patents now are procured and litigated. This presentation examines recent design patent case law and provides practical tips on design patent litigation post-*Egyptian Goddess*.

Christopher J. Renk, Banner & Witcoff, Ltd., Chicago, IL

9:30 a.m. .50 hr ethics

### Ethics Issues Relating to Patent Practice

The presentation addresses recent developments in both legal malpractice and conflicts (disqualification) cases which arise out of patent prosecution and litigation, and offers a few practical tips for minimizing your risk of finding yourself in either situation.

10:15 a.m. .50 hr ethics

### Disqualification Motions

Overlooking procedural issues that accompany a motion to disqualify can have a serious impact. This session describes issues concerning standing, which rules apply in state and federal court and the roles they play, the impact of disqualification on existing work product, and the question of appealability.

David Hricik, Mercer University School of Law, Macon, GA

10:45 a.m. .50 hr

### Corporate Patent Strategy: Portfolio Management, Monetization and M&A Issues

Patents exist for one reason ... money. If a patent isn't making money for a patent owner, either directly or indirectly, then patents aren't worth the expense. To ensure an adequate return for patent assets, patent owners must develop a comprehensive strategy that governs all patent operations, from patent selection/creation, patent portfolio management and patent monetization to asset M&A. Do you (or your clients) have a strategy that is the lighthouse for all your patent operations?

Keith E. Witek, Advanced Micro Devices, Inc., Austin, TX

11:15 a.m. .75 hr

### Patent Pools Standards and Patent Misuse

Patent misuse generally requires a showing of market power, yet with the persuasive use of patent pools to license de facto or de jure standards, as well as the establishment of licensing companies that administer both patent pools and private portfolios, market power is easier to prove and the focus is now on the actual conduct and its consequences.

"Excellent and timely topics—things I can use in my practice."

"As usual, the conference had an excellent program of topics, speakers, and materials."

"Good variety of prosecution, litigation, and other topics."

"The program was excellent. It had a good balance between issues."

"This CLE is always a very nice update of recent developments from the past year."

"The program's focus is good—more than the layman view. I appreciate the complexity of analysis."

**Strategic Reexams: Top 10 Issues**

The interplay between reexam and litigation creates issues that must be dealt with strategically in each proceeding. Discussed are real life examples of how cases play out regarding the decision to file; joint defense groups; timing considerations including stays, "late" filings and pendency; judicial views of events in reexam and vice versa; Office Action Responses and use of declarations; the impact of allowed claims and intervening rights; petition practice; and appeals to the BPAI.
