LUNCHEON PRESENTATION

<p>12:50 pm 0.50 hr</p>	<p>100% Renewables in a City Near You</p> <p>This summer Georgetown began receiving power from a solar farm in West Texas. The solar farm, in conjunction with a wind farm in the Texas Panhandle, makes Georgetown one of the few cities in the U.S. with 100 percent renewable energy. The decision to go with renewables was predominantly a financial one, but the City has been fortunate to receive coverage from across the world regarding our energy portfolio.</p> <p>Dale Ross, Mayor, City of Georgetown - Georgetown, TX</p>
<p>1:20 pm</p>	<p>Break</p>

<p>1:35 pm 0.75 hr</p>	<p>EPC Contract Considerations for Renewable Energy Projects</p> <p>Engineering, procurement, and construction contracts (EPC contracts) are used for the development of renewable energy projects. This presentation will focus on key provisions in EPC contracts and issues arising thereunder, including, among others, liquidated damages, indemnity, warranties, limitations of liability, lender protections and requirements, and changed conditions. A discussion on developer and contractor competing interests and concerns, along with best practices, will also be covered.</p> <p>Alan Cohen, Partner, Stahl, Davies, Sewell, Chavarria & Friend LLP - Austin, TX Spencer Preis, Vice President & Associate General Counsel, Southwire Company, LLC - Carrollton, GA</p>
<p>2:20 pm 0.75 hr</p>	<p>Endangered Species and Wildlife - Mitigation as Risk Management</p> <p>Endangered species and protected habitat areas can present risks to renewable projects, including potential impacts to project timing and costs. Purchasing mitigation land is one tool that can be used to manage risk in both the solar and wind energy context.</p> <p>Christine Fernandez Owen, Attorney, Clean Law PC - Chicago, IL Brooke M. Wahlberg, Partner, Nossaman LLP - Austin, TX</p>
<p>3:05 pm 0.50 hr</p>	<p>Boilerplate Clauses in Contracts</p> <p>Boilerplate clauses are seldom negotiated but are often some of the earliest clauses reviewed in the event of a dispute. Although boilerplate clauses are reused in contract after contract, they should be carefully reviewed for reliability, enforceability, and relevance each time they are used in a contract.</p> <p>Ann Walker McDowell, Associate Director - Legal, EDP Renewables North America - Houston, TX</p>
<p>3:35 pm</p>	<p>Break</p>
<p>3:45 pm 0.50 hr</p>	<p>Best Practices for Solar Development in Resolving Mineral Estate Issues</p> <p>A general overview of relevant law in selected states concerning minerals, such as limitations acts, dormant mineral interest acts, surface damage laws, and statutory notice requirements. Review the doctrine of accommodation or due regard and consider title insurance and requirements, such as surface waivers or drill site agreements for available endorsements.</p> <p>James L. (Jim) Gosdin, Sr. Vice President, Associate General Counsel, Chief Underwriting Counsel & Chief Reinsurance Counsel, Stewart Title Guaranty Company - Houston, TX</p>
<p>4:15 pm 1.00 hr ethics</p>	<p>That's All the News for Today. Stay Ethical, Austin!</p> <p>In recent years, the news has highlighted ethics issues relating to conflicts of interest, confidentiality, the use of social media, supervision of non-lawyers, and other topics. This panel will use factual scenarios to discuss the requirements and lessons of the ABA Model Rules of Professional Conduct, including Rules 1.6, 1.7, 5.3, and 7.1 and to consider practical ways to identify and avoid ethical pitfalls. Some scenarios are ripped from current headlines; others are conceptualizations of problems worth avoiding.</p> <p>Moderator: Prof. Irma Russell, Edward A. Smith/ Missouri Chair in Law, the Constitution, and Society, University of Missouri-Kansas City School of Law - Kansas City, MO</p> <p>Panelists: Alison Leonard Gardner, Sr. Vice President & General Counsel, E.On Climate & Renewables - Austin, TX Tracy L. Kepler, Director of Center for Professional Responsibility, American Bar Association - Chicago, IL</p>

Commercial & Industrial Energy Procurement of Renewable Energy

In 2016, MGM Resorts completed a bold and ambitious process to separate from its local electric utility in Las Vegas and enter the wholesale power market. This action set an industry trend, enabled MGM Resorts to control its own course of energy procurement, and paved the way to one of the largest private solar development partnerships in the Country.

Developer Perspective on Hedges, Traditional PPAs, and Insurance Related Products

The choice among traditional PPAs, price hedges or insurance related products as means to reduce or eliminate risk to future project revenues, is based upon energy price and non-energy price features of each type of contract and prevailing market conditions. Different regions across the North American power markets can favor different solutions at the same time.
