

42nd Annual Conference on Immigration and Nationality Law
October 25, 2018

Effect of Immigration on the Economy with Implications for Policy

Pia Orrenius
Vice President and Senior Economist
Federal Reserve Bank of Dallas

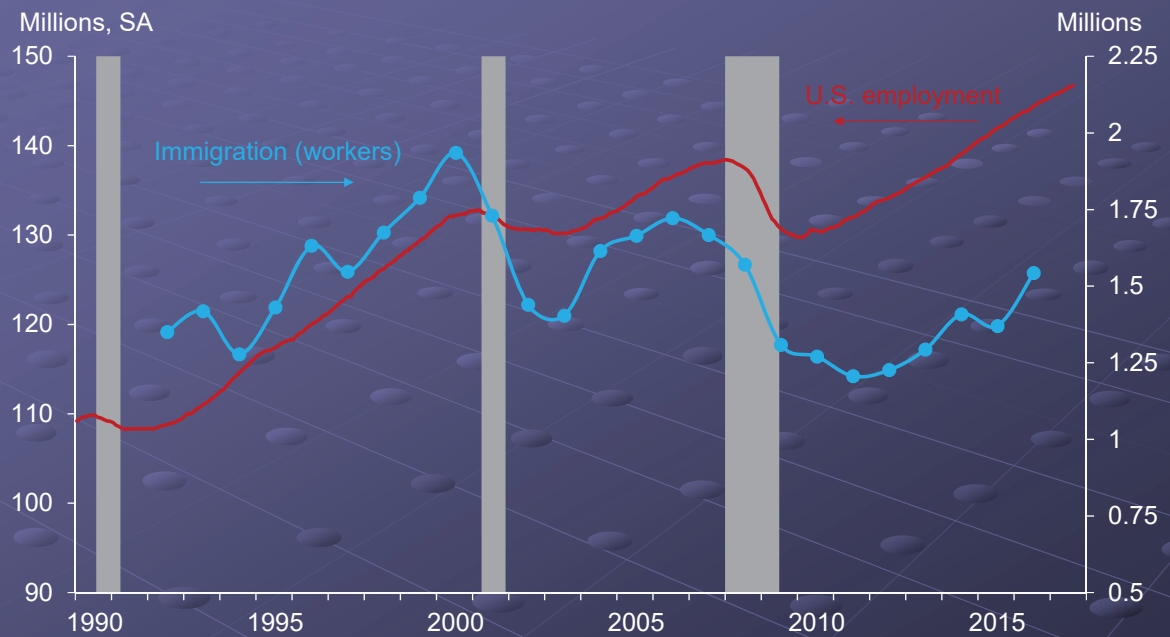

Disclaimer: The views expressed herein are those of the presenter; they do not necessarily reflect the views of the Federal Reserve Bank of Dallas or the Federal Reserve System.

Road map

- Recent trends
 - Immigration is lagging job growth
 - Immigration key to future labor force growth
- Labor market effects of immigration
 - Efficiency; productivity growth
- Effects on native workers
 - Winners and losers
 - Short run versus long run
- Effects of current policies: E-Verify, TPS (DACA)
- Fiscal effects
- Policy implications

RECENT IMMIGRATION TRENDS

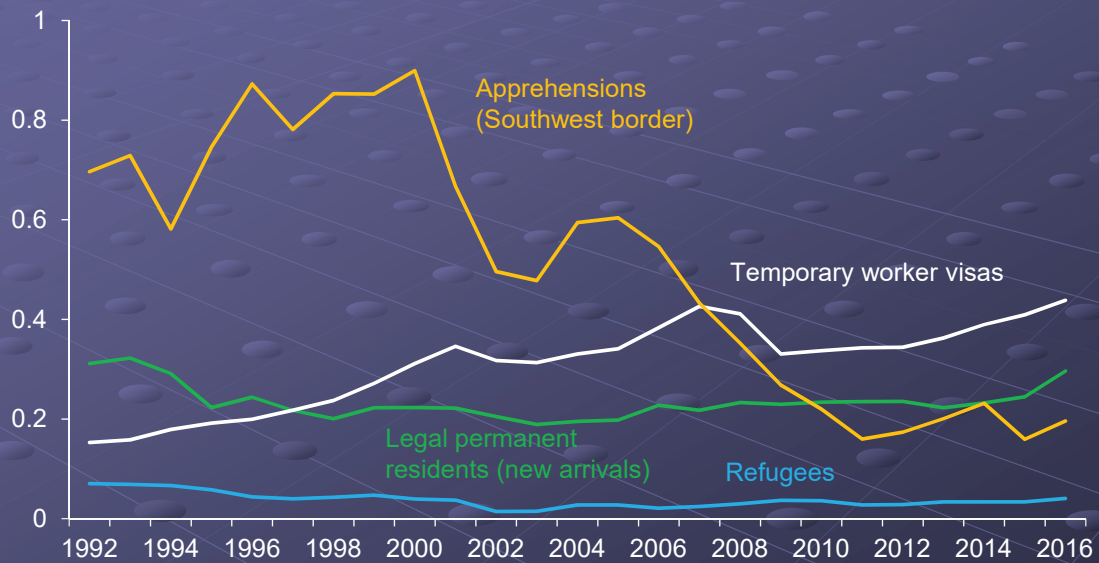

Employment and immigration diverge after the Great Recession

NOTE: Working immigrant inflow calculated annually using adult new arrivals and US labor force participation rates.
SOURCES: Bureau of Labor Statistics; DHS; author's calculations.

Despite steady growth, migrant inflows slow to rise

Inflows as % of working-age population

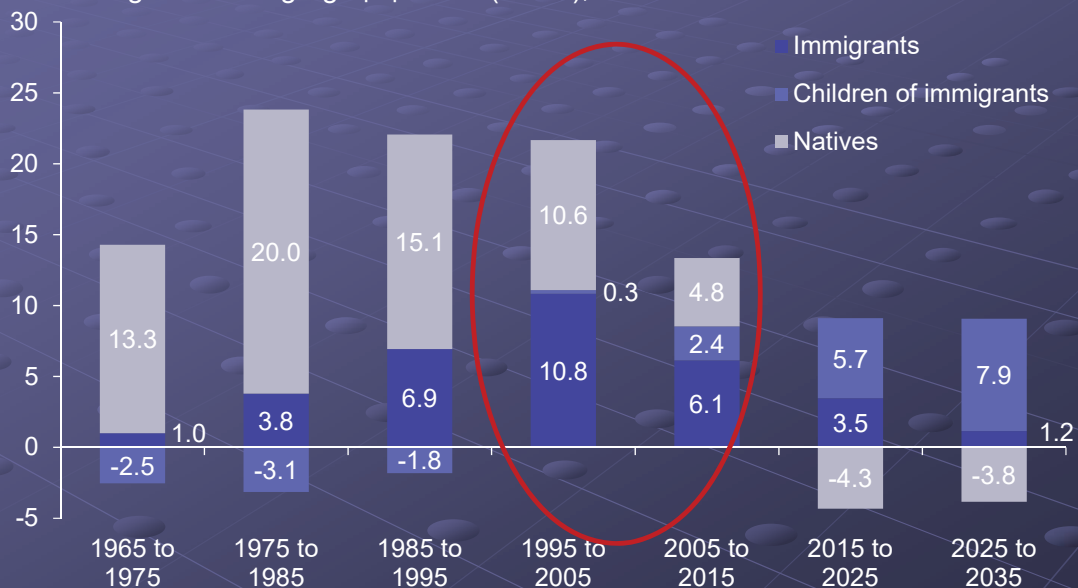

NOTE: Working age population is 16 to 64.

SOURCES: U.S. Department of State, *Report of the Visa Office*; U.S. Department of Homeland security, *Yearbook of Immigration Statistics*; U.S. Customs and Border Protection; U.S. Census Bureau.

Nearly half of labor force growth due to immigration since 1995

Net change in working-age population (25-64), millions

Source: Pew Research Center population estimates and projections (2015).
