

ENERGY OPPORTUNITY: THOUGHTFUL PATHWAY TO EMISSIONS REDUCTIONS

1

Abundant natural gas supplies & expanding infrastructure has led to low & stable prices

Daily Natural Gas Prices
Prompt-Month Futures at Henry Hub (\$/MMBtu)

US Dry Natural Gas Production
(Tcf)

Affordable

Clean

Reliable

Resilient

Abundant

2

Natural gas utilities and its customers have made significant progress reducing emissions

Declining Customer CO2 Emissions

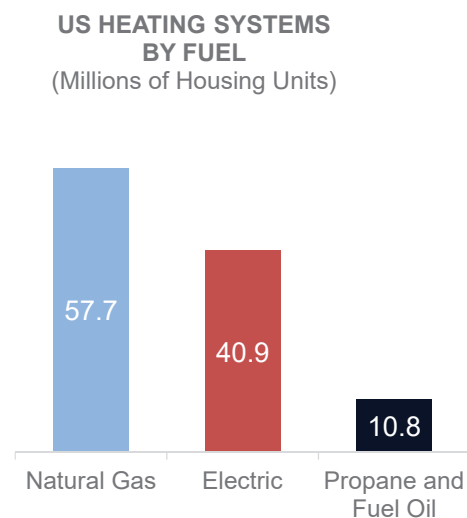

Reductions of Methane

3

A Closer Look at the Residential Market

Natural gas is the primary source for heating in homes

Residential natural gas use accounts for only 4% of U.S. greenhouse gas emissions.
