## Mental Health Statistics

- Nearly 1 in 5 US adults aged 18 or older reported any mental illness (AMI) in 2017
- 46.6 million people, or 18.9% of all U.S. adults
  - Young adults aged 18-25 years reporting AMI - 25.8%
  - Adults aged 26-49 years reporting AMI - 22.2%
  - Adults aged 50 and older reporting AMI - 13.8%
- AMI is defined as a mental, behavioral, or emotional disorder, ranging from no impairment to severe impairment

National Institute of Mental Health

## Anxiety

- An estimated 19.1% of U.S. adults had any anxiety disorder in the past year
- An estimated 31.1% of U.S. adults experience any anxiety disorder at some time in their lives
- National Institute of Mental Health

## Major Depression

- In 2017, an estimated 17.3 million adults in the U.S. had at least one major depressive episode. (7.1%)
- Prevalence was highest among individuals aged 18-25 (13.1%)
- 2017 [National Survey on Drug Use and Health](#)

# Most Common Mental Health Issues

## Employer Concerns

Employee

Supervisors

Other employees

Workplace violence

## Employee Perspective

Employer surveys indicate 50% are reluctant to hire someone being treated for depression or a past psychological history

Psychiatric diagnosis can limit career advancement, as employees are less likely to be hired or promoted into executive positions

If an employee takes leave to manage a condition, often they return to face stigma from co-workers, increased oversight, fewer responsibilities

- Episodic disorders qualify for protection as a disability
- “Regarded as” disabled can protect employees subject to discriminatory treatment due to perceived impairment
- Must establish “qualified” for a position, meaning they can perform the essential functions of the job
- Can request accommodation from employer due to mental health issue that qualifies as a disability
