# Disclaimer

The contents of this document are the opinions of Filsinger Energy Partners (FEP) and represent our understanding of various markets and analysis of market conditions. It is entirely based on our interpretation of publicly available information.

Nothing in this presentation should be interpreted as a prediction of future prices or market clearing results.

FEP does not accept any liability with respect to this presentation, any omissions concerning this presentation, any reliance that you may place on this presentation, or any representations (express or implied) made by FEP or concerning this presentation. FEP and its affiliates, and their respective principals, employees, directors, officers and agents will not accept liability under any theory for losses suffered, whether direct or consequential, arising from your reliance on the presentation, and cannot be held responsible if any conclusions drawn from the presentation or any explanations in relation thereto that are made should prove to be inaccurate.

# Agenda

## Overview of the power markets

Natural gas prices changed the dynamic

Power prices are significantly impacted

Environmental regulations slam coal

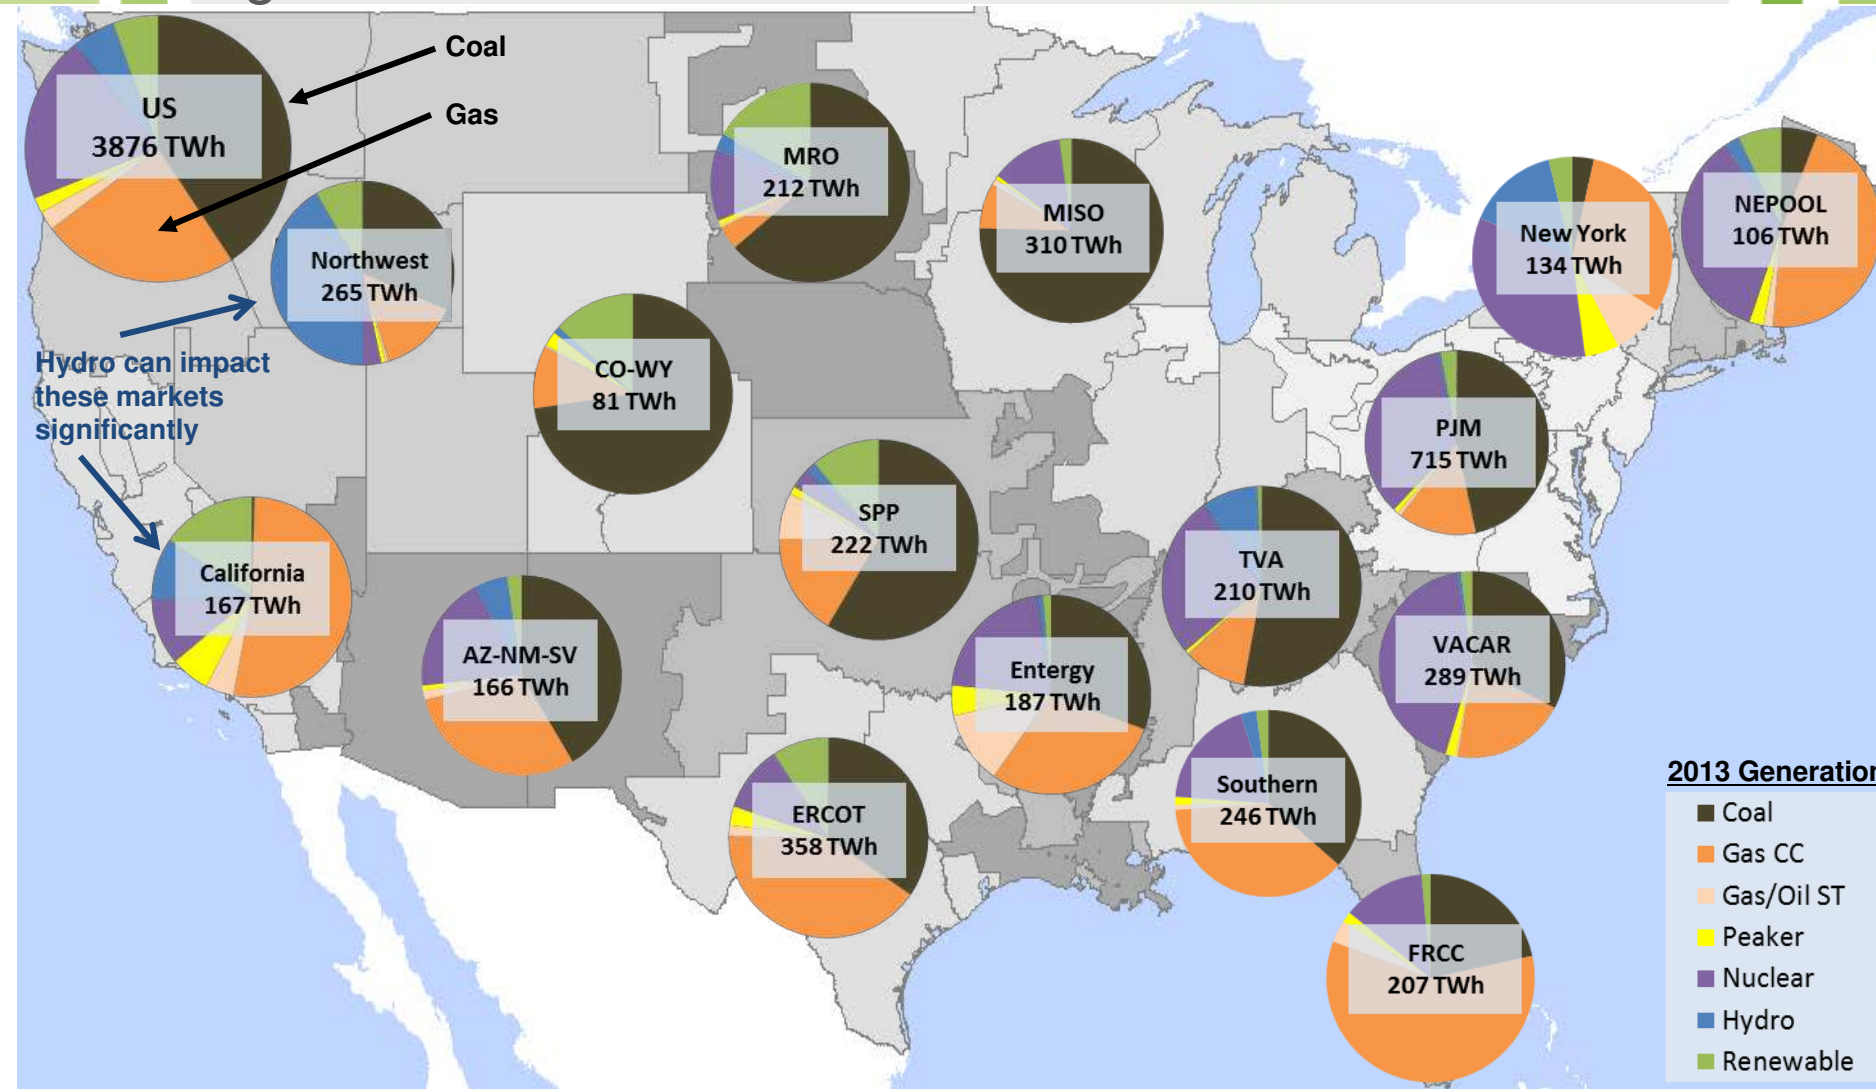

Renewables further complicate it

Conclusions

The industry has passed through periods of favored capacity additions

Resulting in significant coal and natural gas generation
