1. Managing Vendor Risk
2. The Phone Rings – It's a Cyber-Attack!
3. Common Hurdles in Incident Response
4. Privilege In Cyber Investigations
5. An Ounce of Prevention
6. Audience Q&A

## 1. Managing Vendor Risk

Vendors pose significant cyber risks because they:

- Have access to, or maintain, the company's sensitive information, and/or
- Have access to the company's network.

# 1. Managing Vendor Risk

To mitigate risks:

- Conduct thorough due diligence
- Draft contracts that address risks with:
  - Appropriate representations and warranties
  - Audit rights
  - Required ongoing training
  - Strong notice provisions
  - Insurance requirements
  - Indemnity provisions

# 2. The Phone Rings – It's a Cyber Attack!

- Ways you may discover a cyber-attack
- First response?
- Who is on your incident response team?
  - Quarterback – compliance/legal?
  - Fullback – business unit?
  - Halfback – asset protection/  
investigative team
  - Defensive line – media/PR?
