### I. Introduction

Recent decisions in several federal district and appellate courts have addressed and resolved a number of key issues regarding the procedural and substantive scope of the government's environmental criminal enforcement authority concerning maritime operations in the United States. Some of the decisions resolve issues that have been the subject of numerous prior judicial challenges; and some address questions of first impression that will likely help to guide future enforcement actions under the relevant maritime statutes. Taken together, these judicial opinions establish boundaries that the U.S. Coast Guard, federal prosecutors, and maritime practitioners, as well as commercial vessel owners and operators, should understand.

This article provides a comprehensive review of these court decisions that have affected a broad sweep of issues related to the environmental

11 LINSIN AND GLASNER (DO NOT DELETE)

criminal maritime enforcement program, including the standards that apply to the Coast Guard's shipboard investigation of potential environmental criminal violations, the applicability of the 176 year old Seaman's Manslaughter Statute to the operation of offshore drill ships, the potential amount of a criminal penalty for violations of the marine environmental statutes, and the standards that should guide judicial awards to whistleblowers. As discussed below, opinions have been issued in three cases, Watervale Marine Co., Ltd. v. United States Department of Homeland Security, Angelex Ltd. v. United States, and Wilmina Shipping AS v. United States Department of Homeland Security.<sup>3</sup> These opinions have clarified the extent of the U.S. Coast Guard's authority to detain vessels and crew members and to bar foreign-flagged vessels from entering the navigable waters of the United States during the pendency of or immediately following a preliminary shipboard investigation of potential environmental offenses. An opinion issued in *United States v. Kaluza*<sup>4</sup> has clarified the standards that govern individual criminal liability for deaths resulting from maritime casualties. A memorandum opinion issued in United States v. Sanford Ltd<sup>5</sup> defined limitations on the criminal penalties that the government may seek to impose against organizational defendants convicted of violating environmental maritime laws or regulations. Finally, a number of cases have addressed the standards that should govern judicial awards to individual whistleblowers in criminal maritime enforcement actions.

## II. THE ACT TO PREVENT POLLUTION FROM SHIPS

The most significant federal law that provides criminal penalties for environmental violations in the maritime sector is the Act to Prevent Pollution from Ships ("APPS").<sup>6</sup> Congress enacted APPS to implement two international marine pollution treaties, the 1973 International

1. Watervale Marine Co., Ltd. v. United States Department of Homeland Security, Civil Action No. 12-cv-0105, 2014 WL 3563159 (D.D.C. July 18, 2014).

3. Wilmina Shipping AS v. United States Department of Homeland Security, 934 F.Supp.2d 1 (D.D.C. 2013).

\_

<sup>2.</sup> Angelex Ltd. v. United States, 723 F.3d 500 (4th Cir. 2013).

<sup>4.</sup> United States v. Kaluza, Criminal Action No. 12-265, 2013 WL 6490341 (E.D. La. Dec. 10, 2013).

<sup>5.</sup> United States v. Sanford Ltd., No. 11-352 (D.D.C. 2012).

<sup>6.</sup> Act to Prevent Pollution from Ships of 1980, 33 U.S.C. §§ 1901-1915 (2012).
