THE DESIGN DEFECT PROPOSAL

PJC 71.4 Design Defect

QUESTION _____

Was there a design defect in the *automobile* at the time it left the possession of *ABC Company* that was a producing cause of the [*injury*] [*occurrence*] in question?

A “design defect” is a condition of the product that renders it unreasonably dangerous as designed, taking into consideration the utility of the product and the risk involved in its use. For a design defect to exist there must have been a safer alternative design.

“Safer alternative design” means a product design other than the one actually used that in reasonable probability—

1. would have prevented or significantly reduced the risk of the [*injury*] [*occurrence*] in question without substantially impairing the product’s utility and
2. was economically and technologically feasible at the time the product left the control of *ABC Company* by the application of existing or reasonably achievable scientific knowledge.

Answer “Yes” or “No.”

Answer: _____
