

Disruptive Technologies for the Mortgage Industry

Chitra Dorai, Ph.D.

IBM Fellow and CTO Cognitive Services

IBM Global Business Services

The Future of Residential Mortgage Lending

Sep 27, 2017

Austin - AT&T Conference Center

The digital explosion of data makes it impossible for humans to make sense of it all

Data you possess

- Customer records
- Transactional systems
- Business support
- Institutional expertise
- Operational systems

Structured and active

+

Data outside your firewall

- News
- Events
- Social media
- Weather
- Geospatial information

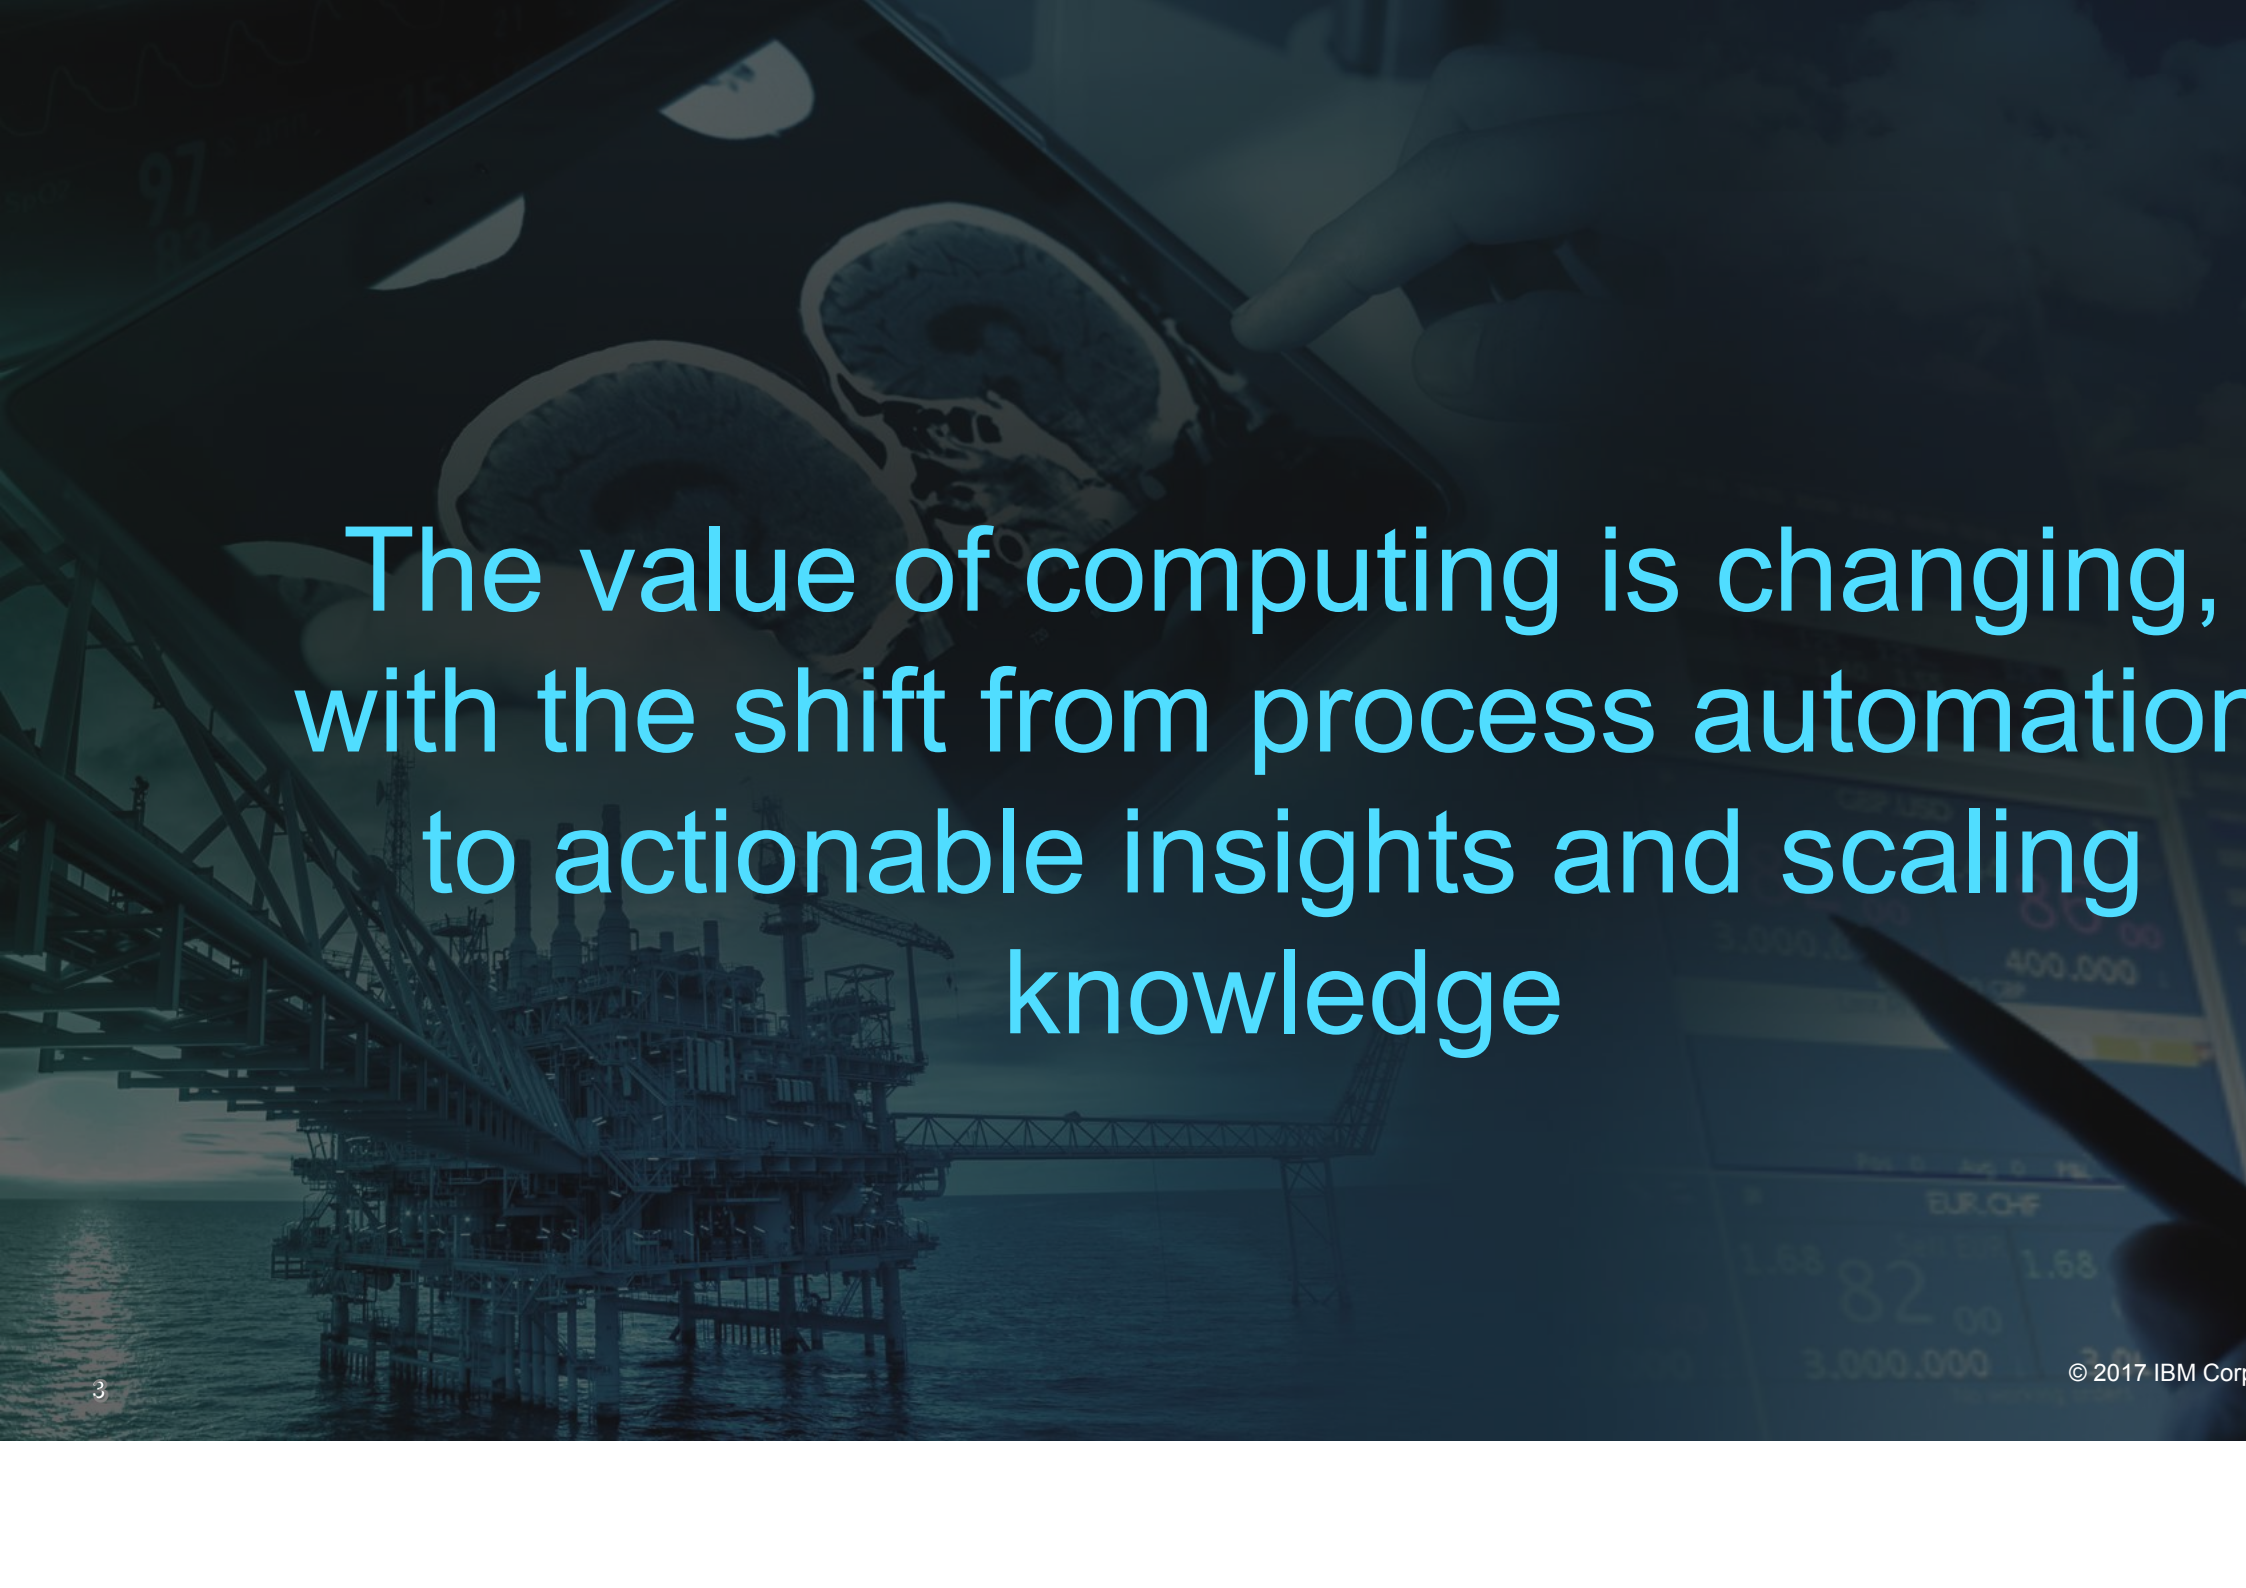

+

Data that's

- Internet of Things
- Sensory data
- Images
- Video

Unstructured and passive

Total data volumes projected to be 44 Zetabytes by 2020*
(1 ZB = 1 billion terabytes = 1 trillion gigabytes)

The value of computing is changing,
with the shift from process automation
to actionable insights and scaling
knowledge

Companies are reinventing themselves today shifting to delivering digital based value - Cognitive, Automated, Analytics driven and increased trust with Blockchain

Robotic Process Automation

Analytics

Cognitive Computing

Blockchain
