

Cybersecurity needs for companies (and firms).

- Strong cybersecurity basics.
 - Policies and procedures focused on cybersecurity.
 - Social engineering.
 - Password and security questions
 - Training of all employees.
 - Phish all employees (esp. executives).
 - Signature based antivirus and malware detection.
 - Multi-factor authentication.
 - Backups segmented from the network.
 - Incident response plan.
- Encryption for sensitive and air-gap for hypersensitive data.
- Adequate logging and retention.
- Third-party security and supply chain risk management.*
- Intrusion detection and intrusion prevention systems.*
