

## Cybersecurity needs for companies (and firms).

- Strong cybersecurity basics.
  - Policies and procedures focused on cybersecurity.
    - Social engineering.
    - Password and security questions
  - Training of all employees.
  - Phish all employees (esp. executives).
  - Signature based antivirus and malware detection.
  - Multi-factor authentication.
  - Backups segmented from the network.
  - Incident response plan.
- Encryption for sensitive and air-gap for hypersensitive data.
- Adequate logging and retention.
- Third-party security and supply chain risk management.\*
- Intrusion detection and intrusion prevention systems.\*
