

# UT Law Conference

Renewable Energy

January 2018

## Weather Risk Management

Weather risk refers to earnings or budget volatility caused by variable weather expressed as an objective index

Weather risk management involves buying a financial protection product based on that same index which helps mitigate this volatility

## GROUND OBSERVATIONS

## SATELLITE DATA

### INDEPENDENT, QUALITY-CONTROLLED SETTLEMENT DATA

Temperature	Precipitation
Snowfall	Hurricanes
Solar Irradiance	Wind Speed
River Depth	Wave Height

HIGH-QUALITY WEATHER DATA, AVAILABLE ACROSS THE WORLD AND PROVIDED BY GOVERNMENT WEATHER AGENCIES AND PRIVATE ORGANIZATIONS, CAN BE USED FOR BOTH HISTORICAL MODELING AND TRANSACTION SETTLEMENT.

## Key Industries Exposed to Weather Risk

There is increasing interest for structured protection from buyers in a variety of industries exposed to variable weather:

- ❖ **Agriculture** Crop yield, handling, storage, pests
- ❖ **Construction** Delays, incentive/disincentive clauses
- ❖ **Energy (Traditional)** Fluctuating demand
- ❖ **Energy (Renewable)** Fluctuating supply
- ❖ **Entertainment** Postponements, reduced attendance
- ❖ **Food & Drink** Reduced demand, increased raw material costs
- ❖ **Governments** Budget overruns
- ❖ **Insurance** Increased claims
- ❖ **Manufacturing** Reduced demand, increased raw material costs
- ❖ **Retailing** Reduced demand of weather-sensitive products
- ❖ **Transportation** Budget overruns, delays
