Partners, Brentwood, TN

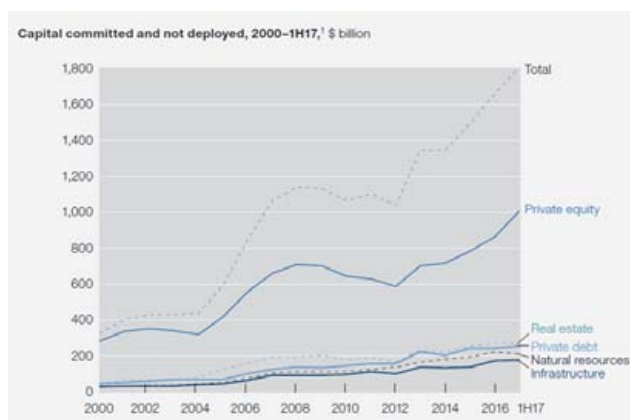

Private Equity in Healthcare

Private Equity in Healthcare

Available Capital Continues to Rise

A recent McKinsey report estimates available capital (“dry powder”) has approached \$1.8 trillion across all private markets¹.

¹ McKinsey defines private markets as closed-end funds investing in PEE, real estate, private debt, infrastructure, or natural resources, as well as related secondaries and funds of funds. McKinsey excludes hedge funds and publicly traded or open-end funds.

Private Equity in Healthcare

Available Capital Continues to Rise

Private Equity Money Raised but Not Invested Data through Q4 2017

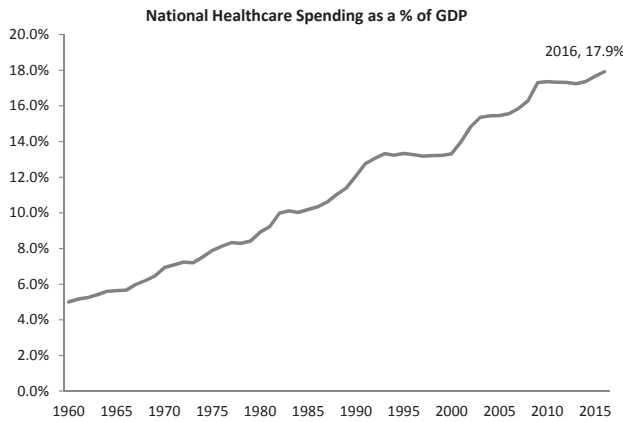

Global PE Trends

- Investors have poured money into PE funds
- At the same time, managers are finding it challenging to find attractive deals since asset values are so high
- The average time it takes for committed dollars to be deployed is approaching 3 years.
