Starting the Program:  
Mapping Out a Path  
Forward

---

# Concept of Cybersecurity

Cybersecurity is about keeping information and systems **safe, available** and **accurate**.

**Cyber awareness needs to be embedded in the corporate culture and your personal use of technology.**

# Concept of Cybersecurity

Cybersecurity is a business problem. It is not a technical problem. Like any business problem, cybersecurity has legal, policy, behavior, brand/reputation and technical implications and consequences.

The goal of a security program is to identify and manage risk, raise awareness and support beneficial outcomes.

Do you see cybersecurity risk the same way as other business risk?
