Meet the Speakers:

Jeremy Drzal

Founder & CEO
Block512
Austin, Texas

Jeremy Drzal is Founder and CEO of BLOCK 512, a platform agnostic consortium of experts providing Insights, Advisory, and Acceleration services for blockchain optimized solutions with viable business models. Past projects include end-to-end oversight for CRYPTO20 initial coin offering (ICO), the first tokenized crypto-index fund powered by data science and AI to auto-rebalance weekly.

Introduction to Distributed Ledger Technology

Does anyone remember the Encyclopedia Americana?

This is an example of a Centralized Ledger, with a single source responsible for accuracy of all information.

Introduction to Distributed Ledger Technology

Has anyone heard of Wikipedia?

WIKIPEDIA
The Free Encyclopedia

This is an example of a Distributed Ledger, with multiple contributors and community verification.

Introduction to Distributed Ledger Technology

Distributed Ledger Technology is Characterized by:

- Multiple locations or “nodes” from which the ledger may be accessed
- Multiple parties with access to the ledger and the ability to alter or verify it
- Access may be private (closed) or public (open)
- No single authority with ultimate responsibility for content or verification
- Reliance on the collective effort of the community to update and verify content
