OECD and the BEPS initiative

BEPS impact on PE

- ▶ Article 7 proposes substantial changes to what constitutes an agency PE and creates stricter requirements to meet exclusions.
- ▶ The goal is to ensure where an agent's activities in a country are meant to regularly enter into contracts to be performed by a foreign entity, that entity will be considered to have a PE “unless the intermediary is performing these activities in the course of an independent business.”
- ▶ The changes will also limit the use of a number of exceptions that are of a “preparatory or auxiliary nature and will ensure that it is not possible to take advantage of these exceptions by the fragmentation of a cohesive operating business into several small operations.”
