# Risk Mitigation Tools

Companies can mitigate the financial impact of coronavirus by: (1) examining their insurance policies that may transfer these losses to their insurers; and (2) consider provisions that may relieve them of their contractual obligations.

## Insurance

- There are several types of insurance that may respond to the coronavirus outbreak, including but not limited to:
  - Communicable disease coverage;
  - Decontamination coverage;
  - Civil or military authority coverage;
  - Traditional business-interruption/contingent business-interruption coverage;
  - Event insurance (predominantly travel and entertainment industry);
  - Trade-disruption insurance; and
  - Traditional CGL policies.

## Force Majeure Clauses

- Companies may benefit from or be harmed by the triggering of a force majeure clause

# Potential Coverage: Property Policies

Commercial property policies may contain a number of applicable coverage parts and endorsements.

## Communicable Disease Coverage

- Some include endorsements that specifically provide coverage for communicable diseases, including viruses.
- These endorsements may require the “actual” presence of the virus in order to trigger coverage, not merely the threat or fear of the virus.

## Potential Coverage: Property Policies

### Business-Interruption Coverage

- **Traditional business-interruption coverage:** Protects businesses from loss of income resulting from disruptions in operations. Typically requires "direct physical loss of or damage to" insured property.
- **Contingent business-interruption coverage:** Covers financial losses resulting from disruptions to a business's customers or suppliers. Typically requires "direct physical loss of or damage to" suppliers' or customers' property.
- **Civil authority:** Covers financial losses caused by a government or similar order or action.
- **Ingress/Egress:** Covers financial losses caused by inability to access business.

## Other Types of Potentially Responsive Coverage

### Event insurance (predominantly travel and entertainment industry)

- Covers financial losses if an event has to be cancelled or postponed due to an occurrence "outside the control" of the policyholder.
- These policies, however, note that the mere threat or fear of an occurrence is not sufficient to trigger coverage under these policies.

### Trade-disruption insurance (TDI)

- Covers the consequential loss that results from a loss of earnings, extra expenses and contractual penalties incurred because of delays or disruptions in trade flows.
- TDI differs from the standard business interruption coverage afforded by marine cargo or property forms by not requiring that there be a direct physical loss to goods or their conveyances.
