- Affects:
 - Force Majeure
 - Contract Structures
 - Change in Law
 - Covenants

Background

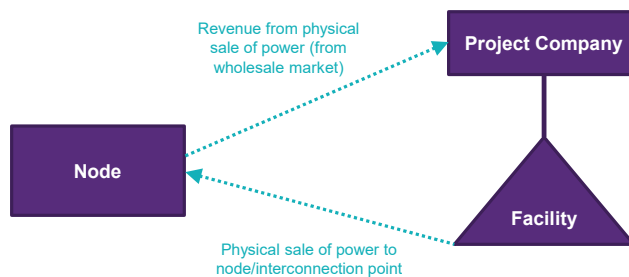

Traditional Power Purchase Agreement

- The facility (solar / wind farm / coal plant) produces electricity and delivers it to the utility at the interconnection point / node.
- The utility pays a constant agreed upon price, pursuant to a long-term PPA.

Merchant Power Sales

- The facility (solar / wind farm) produces electricity and delivers it to the interconnection point / node.
- An electric bus (node) is where a resource's measured output is settled with utility.
- Project co. receives market price for when electricity was delivered.
