

Recognizing Products Liability Claims in Motor Vehicle Accidents

The University of Texas School of Law | 2022 Car Crash Seminar

Muhammad S. Aziz

1

Types of Claims

- Manufacturing Defect
- Design Defect
- Failure to Warn

2

Recognizing Potential Cases

- Minor Collision + Catastrophic Injury
- Multiple Occupants + Only One Seriously Injured
- Restrained Occupants + Seriously Injured or Ejected
- Restrained Occupants + Partial Ejection

3

Types of Defects

- Defective Airbag
 - Non-Deployment
 - Inadvertent Deployment
- Defective Pretensioner
- Defective Air Brake Compressor
- Defective Rear Seat Restraint System

4

Case Study
No. 1

Defective Airbag

Non-Deployment of Side Curtain Airbag

5

Investigator's Narrative Opinion of What Happened
(Attach Additional Sheets If Necessary)

Driver of Unit 2 was traveling Westbound in the #2 lane in the 9100 block of W. Fairmont Pkwy approaching the intersection (9000 block of W. Fairmont Pkwy). Driver of Unit 1 was traveling Eastbound in the turn only lane in the 8900 block of W. Fairmont Pkwy to travel Northbound onto Canada Rd. Driver of Unit 2 signal light was green and driver of Unit 1 signal light turned red. Unit 1 disregarded the red light and struck Unit 2 on the front left side. Unit 2 vehicle then spun around and struck the concrete light pole on the left driver side before coming to a rest. Officer did not observe any damage to the light pole. Unit 1 at fault.

Event 1

Event 2

The diagram illustrates the intersection of 8900 W Fairmont PKWY, 9100 W Fairmont PKWY, and 3900 CANADA RD. Unit 1 is shown in the turn lane from the eastbound side, and Unit 2 is shown in the westbound lane. Arrows indicate the direction of travel and the path of Unit 2 after the collision. A 'Genoa Red Bluff' is also indicated on the right side of the intersection.
