What is Health Information Technology?

Hardware, software, integrated technologies or related licenses, intellectual property, upgrades, or packaged solutions sold as services that are ***designed for or support use by health care entities or patients*** for electronic creation, maintenance, access, or exchange of health information.

DickinsonWright   ReedSmith

Health IT vs. Consumer Health Apps

Health IT

Hardware, software, integrated technologies or related licenses, intellectual property, upgrades, or packaged solutions sold as services that are *designed for or support use by health care entities or patients* for electronic creation, maintenance, access, or exchange of health information.
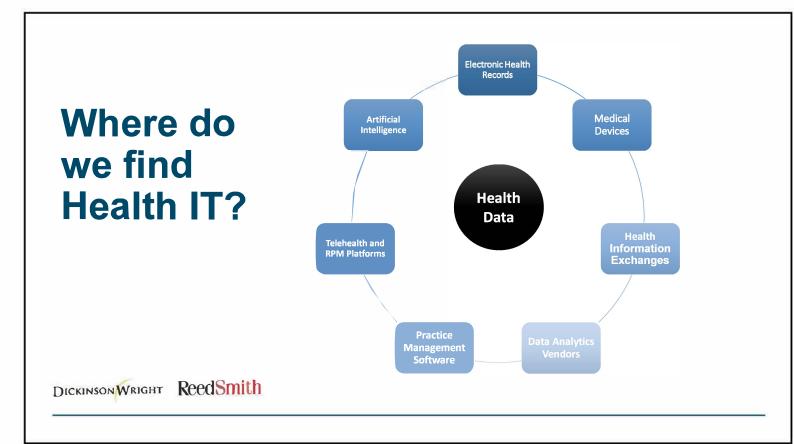

Consumer Health Apps

Hardware, software, and web-based applications that allow *consumers* to participate in their own health and wellness via electronic means.

DICKINSON WRIGHT   ReedSmith

Where do we find Health IT?

Electronic Health Records

Medical Devices

Artificial Intelligence

Health Data

Telehealth and RPM Platforms

Health Information Exchanges

Practice Management Software

Data Analytics Vendors

DICKINSON WRIGHT   ReedSmith

Critical Questions

Who are the users – providers, patients, health plans, consumers?

What information will the technology create, store, process, or transmit?

What is the intended use of the technology?

Who is going to pay for it – providers, patients, health plans (public or private), consumers, *no one*?

DICKINSON WRIGHT   ReedSmith

Myriad of Applicable Legal Frameworks

HIPAA / Health Privacy	Food, Drug, & Cosmetic Act	Cybersecurity	Interoperability

Reimbursement / Fraud & Abuse	Certification & Licensure	AI Governance Frameworks
