Heart of the matter – Will a shocked health system emerge stronger?

While in 2020 many health organizations saw their financial plans obliterated, patient behaviors radically shift and v
explode, in 2021 they will work to put the system back together. Not to how it always was – but in a way that reima
healthcare delivery, reconnects broken pathways and makes a giant leap toward a consumer-centric health system

Industry builds resilience for long-term survival

In 2021, the industry develops its own forecasting systems, reshapes business portfolios post-pandemic and creates a more transparent supply chain.

The pandemic fuels a digital surge

Health organizations take the lessons from the sudden 2020 virtual experiment to build better digital experiences for consumers and clinicians while rethinking clinical trials and research.
