What is a Smart City?

Is there a Definition?

The definition of a Smart City changes as rapidly as the technology that enables Smart Cities.

Is there a Definition?

However, we generally know what we expect from a Smart City.

WHEREAS, there is benefit in "the use of smart computing technologies to make the critical infrastructure components and services of a city (such as city administration, education, public health and emergency services, public safety, real estate and planning/development, code enforcement, transportation and utilities) more intelligent, interconnected and efficient"

City of Austin – RESOLUTION NO. 20161103-051
