FOUR THINGS EVERY BANKRUPTCY LAWYER SHOULD KNOW ABOUT NUMBERS

How does loan amortization work?

Is a debit a good thing or a bad thing?

What balances on a balance sheet?

What does an income statement show?

Amortization

- An amortization schedule reflects the application of payments between principal and interest.
- It shows the principal balance after the application of each payment.
- It calculates the next month's interest amount based on the new principal balance after application of the prior month's payment.
