## FRIDAY AFTERNOON

### Presiding Officer:

Karen Brio, Thumbtack, Austin, TX

### LUNCHEON PRESENTATION

12:05 p.m. 1.00 hr ethics

### Artificial Intelligence Tools and Thoughtful Implementation and Use

We all see multiple stories about the rapid growth and entry into our daily lives of artificial tools. It is difficult to overstate how much things will change with the rise of these new technologies, or how important it is that companies embrace the opportunity to execute it correctly. Having conversations regarding the proper embrace of these technologies and these tools is a crucial first step, including drafting policies to assist companies with their beneficial and thoughtful adoption and use of these technologies, which are unique to each company and industry. This presentation will define the state of artificial intelligence tools, what benefits and risks exist, and finally steps to begin embracing these technologies with appropriate guardrails, policies, and training. It is less likely that artificial intelligence destroys industries, and much more likely that companies that embrace artificial intelligence will take overtake those companies that do not embrace artificial intelligence.

**Technology Vendor Management: Avoiding Pitfalls and Mitigating Risk**

Effective vendor management extends far beyond procurement and contract execution, it requires continuous assessment and monitoring to mitigate legal, regulatory, and cybersecurity risks. But what does that look like, and what common challenges should technology lawyers anticipate? Hear practical insights through real-world examples. Gain a deeper understanding of: identify and how to evaluate vendor risk, conducting vendor assessments against compliance standards, risk-mitigating contractual clauses, incident response preparedness, and risk calibrated continuous monitoring and review.
