Disaster Relief: Outline and Tax Framework

1. General Legal Principles of Disaster Relief

- a. Providing assistance (material and financial) to victims of disasters is a traditional charitable activity for Section 501(c)(3) organizations both in an immediate crisis as well as over a longer term.
- b. Charitable Class Requirement
 - i. A charitable class is required when providing assistance as an exempt activity.
 - ii. Charitable class of beneficiaries is a group of individuals that may properly receive assistance from a charitable organization.
 - iii. The charitable class must be large/indefinite enough to satisfy the IRS that providing aid to members of the class benefits the community as a whole.
- c. Evaluation of Financial Need
 - i. Charitable organization must select recipients of assistance based on an objective determination of need (financial or otherwise).
 - ii. The meaning of “need” and scope of the needs assessment varies depending upon the circumstances, timing and type of aid
 - 1. EX: rescue services and urgently needed food and shelter do not require a needs assessment but ongoing housing and financial support does need to be based on needs.
 - iii. Charitable funds cannot be distributed to individuals merely because they are victims of a disaster – no automatic right to charitable funds.
 - iv. Appropriate records should be maintained to show that distributions are made to individuals after making appropriate needs assessments.
- d. General Documentation Requirements – a charity providing assistance should retain the following records:
 - i. A complete description of the assistance provided;
 - ii. Costs associated with providing the assistance;
 - iii. The purpose for which the aid was given;
 - iv. The objective criteria for disbursing assistance under each program;
