What is Voluntary Pooling?

- Generally refers to combination of lands from two or more leases into a single "unit" for development purposes.
- Many consequences, but two primary consequences:
 - Operations anywhere on unit treated as if they occurred on all land in the unit
 - Production from unit allocated between the pooled tracts and the owners thereof, typically on a surface acreage basis.

Two Unpooled Leases

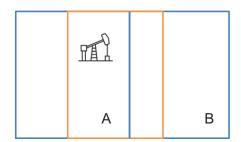

- Lease A: 100% of production from well; operations
- Lease B: 0% of production from well; no operations
